

lifelines iEEG

Portable

A complete, 24-hour HD video EEG solution

PORTABLE & PATIENT FRIENDLY

LifeLines iEEG Portable comprises the most critical features requested by leading clinicians and researchers around the globe:

- Immediate access to critical data, any time, any place
- Superb HD video
- HIPAA compatibility

Easy

The main components come pre-connected inside the lightweight, custom-made case. Just set up the video cameras and plug in the unit.

Flexible

The patient is free to walk around with the small Trackit ambulatory recorder...while still recording EEG & video directly to the tablet PC with a wireless connection.

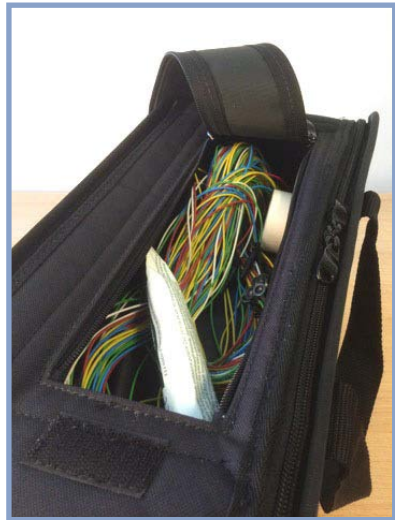

Real-time Review

Upload your EEG & video data to the server in real time via internet, allowing simultaneous remote review.

Small video cameras with flexible, magnetic stand can be easily moved and installed almost anywhere!

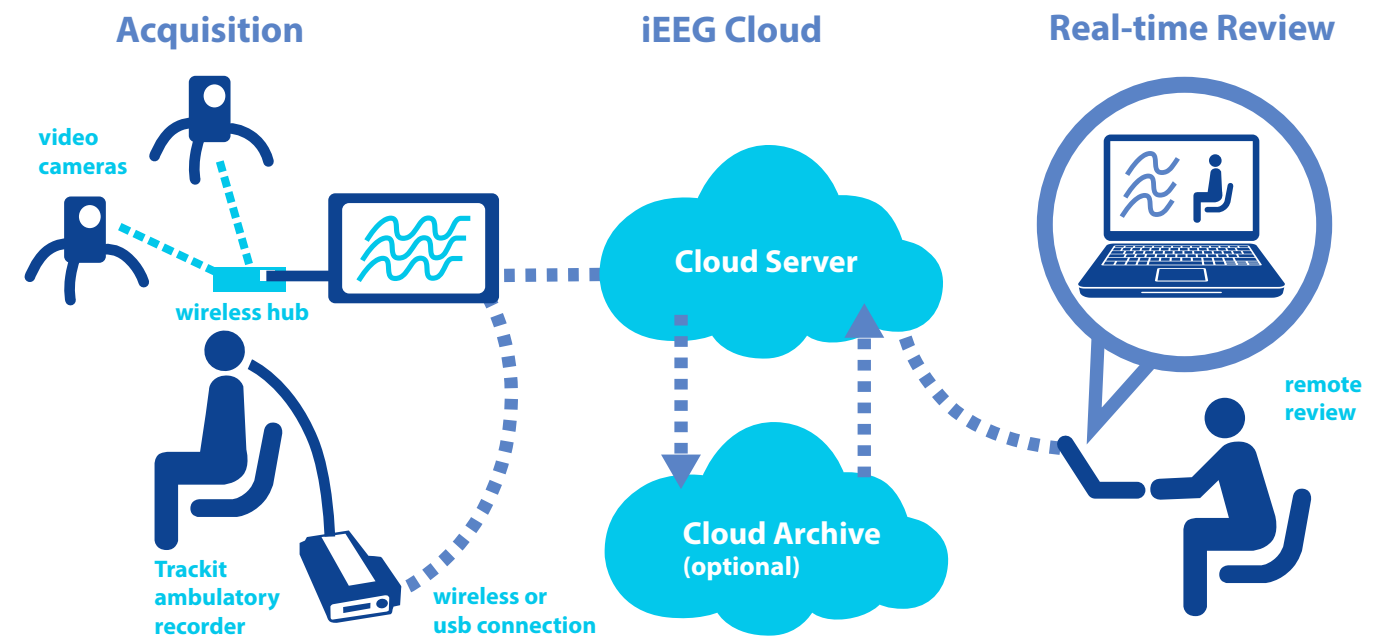

FEATURES & BENEFITS

- **Day & night IR video capability**
1 or 2 HD video views. Synchronization accuracy to 1 frame. Small, wireless video cameras can be easily carried from room to room.
- **Technologist mode**
Includes hyperventilation, photic and other tools. Tab interface guides you through the setup.
- **Locked patient mode**
After setting up the recording and performing routine tests, press the 'lock' button to switch to a simple, tamper-free view.
- **Direct, real-time remote monitoring**
Wireless internet allows direct access to EEG & video from the cloud server without going through remote desktop applications.
- **HIPAA Compatible**
Encrypted patient data and advanced access controls makes HIPAA compliance easy.

- **Safe 'dual recording mode' – never lose EEG**
Record to CF card on the ambulatory device while also recording direct to PC, thus minimizing your chances of a break in the recording.
- **Virtually unlimited recording capacity**
When using 'direct to PC' mode, or up to 100 hours with dual mode using cabled (8-meter) Trackit connection.
- **Compact, lightweight case**
Concealed power supply, hub, and connection cables – plus an additional storage area for accessories such as electrodes and tape.

iEEG Portable with iEEG Cloud Solution:

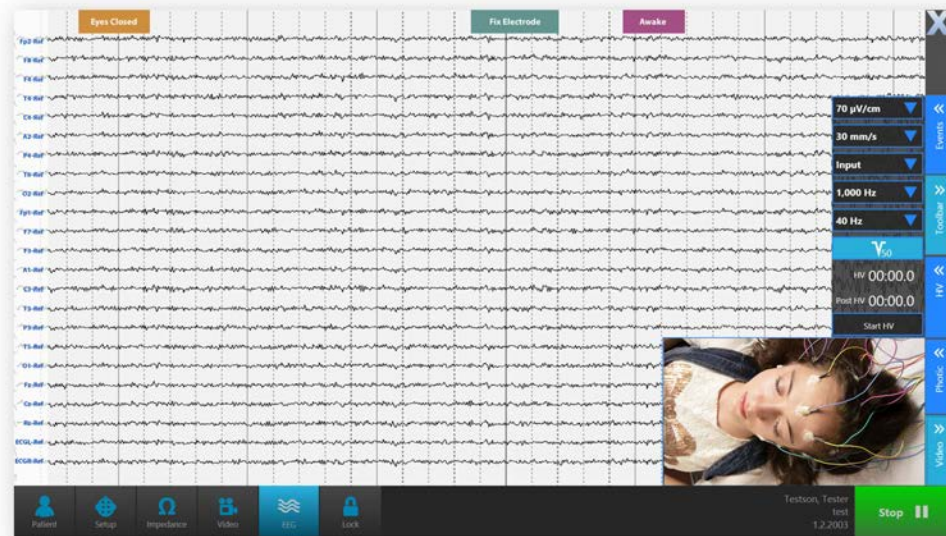

CLEAN, INTUITIVE INTERFACES

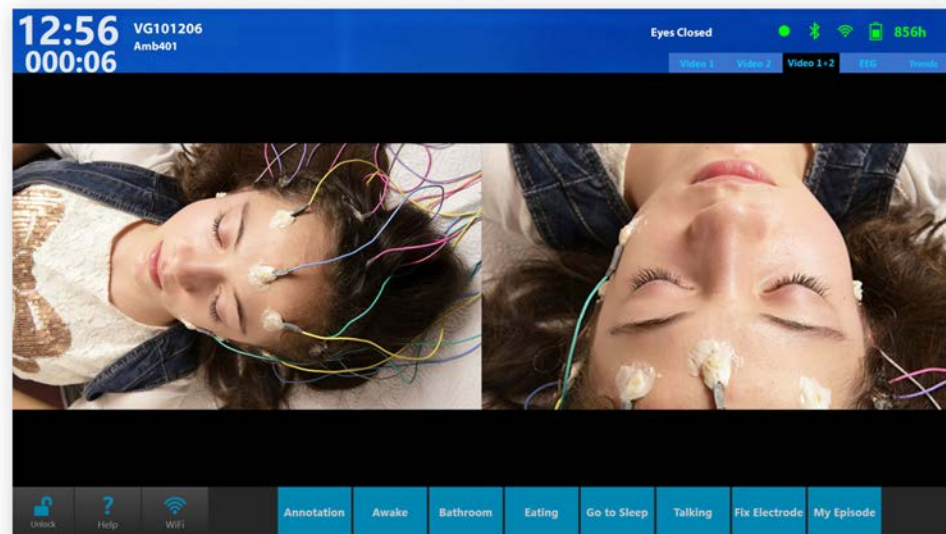

Touchscreen Tablet Acquisition

Technologist Setup View

The sequential tabs guide you through set up. When ready, touch the lock button to switch to patient mode.

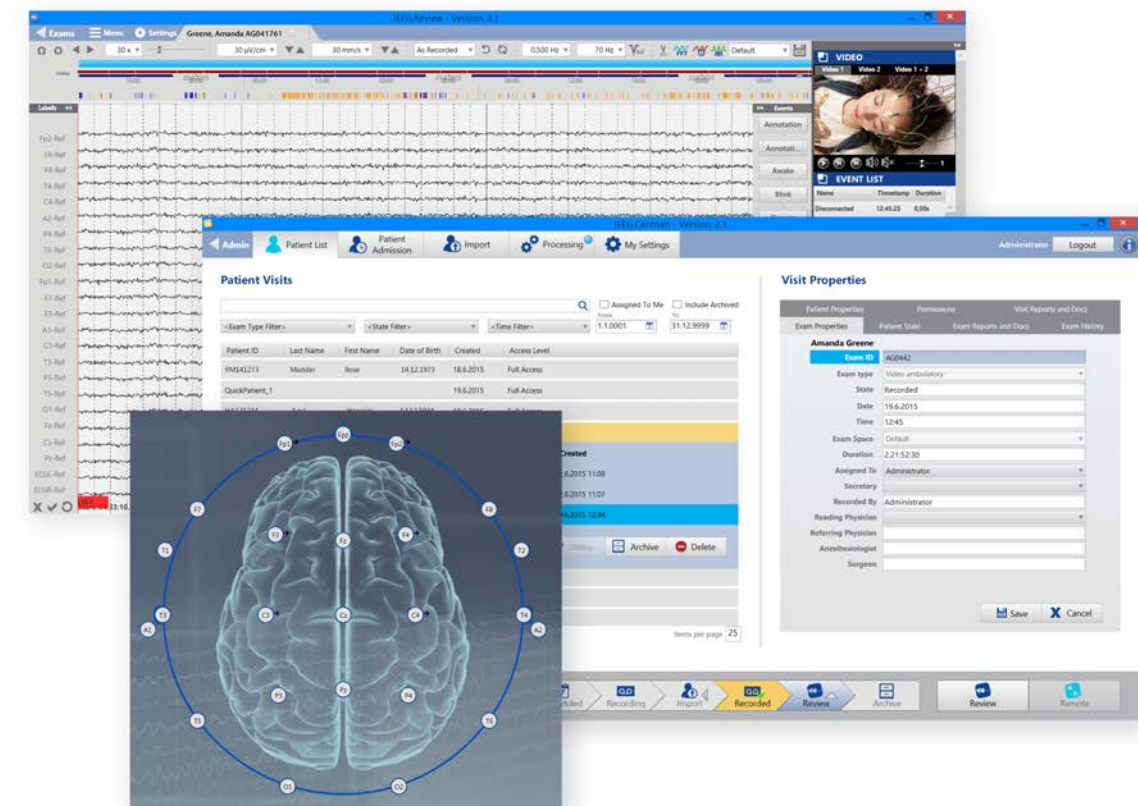

Locked Patient View

The locked patient view allows event entry, access to help plus indicators to show that everything is running smoothly.

Powerful Patient Management & Review

The server-based iEEG Centrum & Review are critical components of iEEG Portable, offering unlimited clients for a laptop or desktop PC. Centrum & Review provide powerful patient management & review with a clean, easy to use interface. A full range of features are supported, such as power trending, artefact removal, custom reports, EEG & video pruning, spike & seizure detection, and customizable interface.

Optional Cloud Archive Storage

Store your large files safely encrypted in a geographically redundant manner, and pay for only the space you use.

SPECIFICATIONS

- Day & night IR video capability
- Wireless HD video, one or two cameras
- Tamper-proof locked patient mode
- Technologist mode with photic tool, HV and more
- Record to PC or PC & Trackit (dual mode recording)
- Wireless Trackit offers mobility with class 1 Bluetooth range
